

# Welcome

Select Plant Hire is one of the UK's largest, most capable, suppliers of equipment and services to the construction and building services industry.

Select owns and operates the UK's largest and most varied fleet of construction equipment. From cranes to compressors, traffic lights to transport, whether you need accommodation or just advice, we have a complete solution that will take you every step of the way – from project design through delivery, to completion.

# Who We Are

With over 30 years in the industry, Select Plant Hire has built an excellent reputation as one of the UK's leading building services providers, playing an integral role in the delivery of a wide variety of innovative, high quality construction projects.

We understand the critical role that logistics, site preparation, working environment, safety and reliability plays in modern construction, and our considered approach ensures our customers receive so much more than just the tools to get the job done. Our expertise enables us to work *with* our clients to develop solutions that maximise efficiency and deliver real value to a project.

# Why Choose Us

Select operates the UK's largest and most diverse range of equipment and tools in the industry. Our fleet is tailored to meet the unique demands of projects, from congested high-rise construction to mega-scale ground-works and civil engineering packages on new-build nuclear projects.

We pride ourselves on being a Total Solutions Provider: providing our clients with a 'one stop shop' for equipment hire, site infrastructure, plant handling, specialist design and fabrication, testing and inspection, as well as ongoing facilities and waste management once a project is complete.

## Tailored Approach

We see our role as much more than simply supplying equipment. We can advise on any aspect of project delivery, from conceptualisation and design through to final delivery, so that you benefit from our experience and make the right choices for your business.

## Investing for the Future of Construction

Business is being transformed by technology, and our clients demand better value and faster delivery. Digital Engineering and DfMA are changing construction and, as such, we continue to invest in the tools and logistical equipment needed to meet the demands of future construction projects.

## Premier Quality

We only purchase equipment from the world's leading manufacturers, and our demanding specifications are renowned for setting the agenda that other suppliers follow. Behind every product or service that we offer there's a powerful commitment to quality.

# How We Work

Through our construction market heritage, we understand the real value and efficiency that a considered approach, tailored to an individual project's needs, can produce.

That is why we plan every activity meticulously. Site visits and detailed consulations are carried out to acquaint ourselves with the project's specific requirements, and we produce detailed method statements and planning documentation for every activity. We support you through a strong team of industry experts who are competent and confident to provide advice and deliver value.

Integration is central to our work. We act as one team, across functions and projects, ensuring the efficiency of communication and collaboration required to allow projects to flourish.

As a natural extension of our offering, we start planning for the operational management, refurbishment and maintenance of projects whilst still in the design stages. Our 6-D models transform in to sophisticated Facilities Management Systems for the entire lifespan of an asset, enabling prediction and planning of maintenance issues - putting you in control and providing long term running and maintenance cost savings.

# Responsibility and Safety

As a leading supplier to the construction industry, we take health and safety and our impact on the environment very seriously. All aspects of our operations are driven by these priorities.

## Safety First

The health and safety of our staff, customers and suppliers has always been a priority for Select. We have recently launched our new safety program, Next Gear, developed in conjunction with leading academics in global safety science, which seeks to raise the standards of safety across projects by building safety resilience through engagement and trust. The three leading principals of the scheme are:

- *People are the Solution - people at the centre of solutions*
- *Positive not Negatives - recognise and measure things that go well*
- *Ethics not Bureaucracy - health and safety is an ethical responsibility*

## Health and Well Being

We are striving to create a healthy environment for our people; one that promotes excellence and acknowledges the evolving changes and demands of personal and family lives. Awareness of mental health, support and development is a key for success.

## Environment

We appreciate that every site or project has different environmental concerns. We take into account any specific environmental requirements that your site may have, and our supervisors will deliver our own Environmental Toolbox Talks during our time on site, in accordance with our Safety Management System.

# What We Do

Select is at the forefront of the latest advances in construction and engineering; we are helping to drive the innovation that is reinventing the construction industry. Our experience and expertise across the entire delivery chain enable us to supply and support, with a proven track record of achievement.

Our extensive resources – and willingness to innovate to solve a challenge – set us apart from our competitors in the market. We can consult, plan, deliver and manage your project from conception to completion with some of the most skilled staff in the industry. We have a reputation for excellence and a passion for success.

# Products

## Lifting Solutions

Comprising of cranes - towers, crawlers and mobiles, hoists, lifting tackle, elevated working platforms, specialist lifting teams etc.

## Site Solutions

Comprising of site setup, modular accommodation, temp electrics and plumbing and site security - man-guarding, CCTV and hoarding

## Specialist Plant

Comprising of Piling Rigs and associated tooling and casing, concrete pumping, instrumentation and monitoring

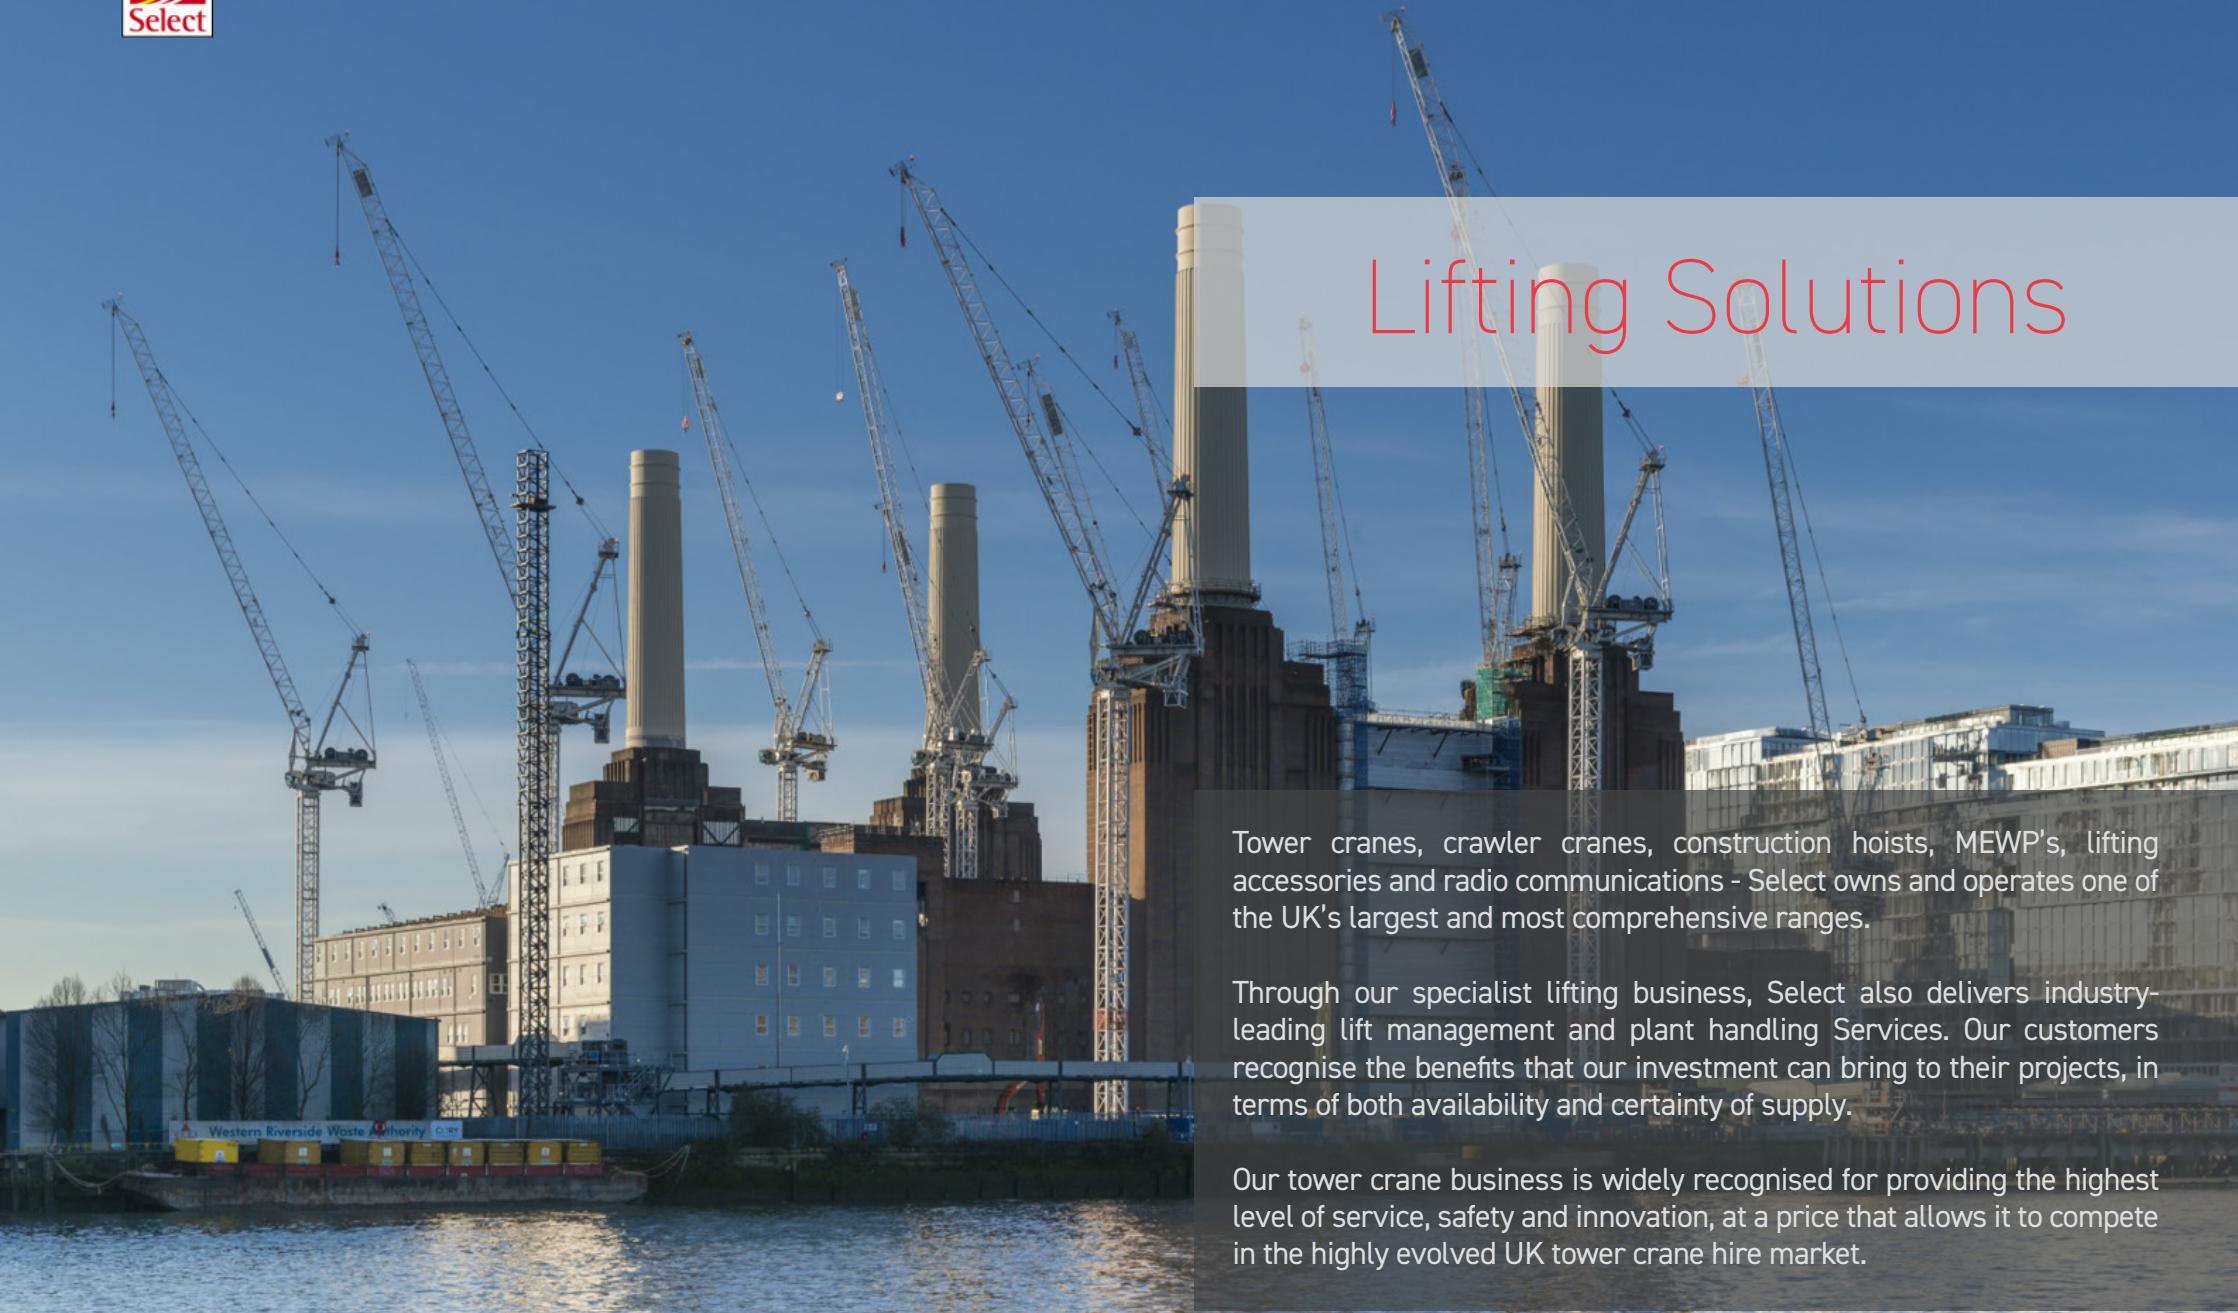

## Fleet

FORS Gold member providing and managing over 2,500 vehicles

## Business Assurance

Test and inspection team providing an "arms length" review of our asset management ensuring we are maintaining and controlling our plant to the highest levels.

## Lifting Solutions

Tower cranes, crawler cranes, construction hoists, MEWP's, lifting accessories and radio communications - Select owns and operates one of the UK's largest and most comprehensive ranges.

Through our specialist lifting business, Select also delivers industry-leading lift management and plant handling Services. Our customers recognise the benefits that our investment can bring to their projects, in terms of both availability and certainty of supply.

Our tower crane business is widely recognised for providing the highest level of service, safety and innovation, at a price that allows it to compete in the highly evolved UK tower crane hire market.

## Tower Cranes

**Select is a world-class leader in tower crane technology, specialising in the hire and sale of tower cranes.**

Based in the UK and operating worldwide, we have built an excellent reputation as one of the UK's leading tower crane providers - integral to the delivery of the UK's most innovative and high profile construction projects.

The Select tower crane fleet is tailored to the demands of each project, from congested high-rise structures to mega-scale ground-works. We have proudly supplied lifting solutions for some of the UK's most iconic projects, including the record-breaking Shard of Glass and The Leadenhall Building in London, two structures made possible only through the tower crane strategy and lifting expertise of the Select team.

Select's tower crane hire service offers a comprehensive solution to project lifting requirements. From initial consultation, we can provide the tower crane most suited to your needs.

## Crawler Cranes

**Select is one of the UK's leading crawler crane providers, with an extensive fleet available for hire.**

Sourced from leading manufacturers such as Liebherr, Hitachi-Sumitomo and Sennebogen, Select offers lattice boom crawler cranes from 55 to 300 tonne SWL and telescopic crawler cranes from 8 to 100 tonne SWL. Most of our fleet can carry offset fly-jibs and luffer attachments, and with a wide selection of boom lengths available we can supply a crane to suit your requirements.

Each of our cranes is delivered in accordance with a bespoke site-specific method statement and will be adapted to comply with your additional requirements. Select's operators have vast knowledge and experience – not just with specialist and general lifting, but also on piling works with Expanded Piling and other contractors.

Our aim is to provide the most complete crawler crane hire service in the UK and we work with like-minded clients to positively change the way in which cranes are delivered and operated.

## Construction Hoist Hire

Operating nationwide, we provide all our customers with a full hoist hire solution – offering shorter delivery times, exceptional service and top-quality hoists at a cost-effective price. From start to finish, we take the necessary level of control over the process to ensure optimum results.

### Standard Range

Range of widths: 1.4–2.0m  
Range of lengths: 2.0–3.9m  
Lift capability up to 2,500kg

### XL Range

Internal working height: 2.8m  
Range of lengths: 3.9–5.0m

### High-Speed Range

For high-rise buildings  
Working speed of 1.7m/s

Select works closely with the manufacturers of our fleet, so we have access to specialist items such as the inclined hoist installed up an escalator runway at the Tottenham Court Road station project or the tower crane lift at Imperial West used to get crane drivers up to their cabs more easily.

### Select's hoist hire services include:

- *Site Surveying*
- *Design and quotation*
- *Pre-start and design meetings*
- *Bespoke design and review*
- *Load calculations and reports*
- *Preparatory works and processing*
- *Installation/erection*
- *Hoist climbing*
- *Remote PLC access*
- *Maintainance and inspection*
- *Breakdown support*
- *Dismantling*
- *Transport*
- *Asset management system*
- *Independent inspection*
- *Audits*

# Specialist Lifting

Having delivered some of the most challenging lifting operations across the UK, we are widely acknowledged as an industry leader. Our directly employed team of highly experienced appointed persons (APs), supervisors and operatives are qualified to the highest level and have delivered complex lifting contracts in some of the most constrained urban areas.

## Contract Lifts

Our contract lifts service enables you to transfer the overall responsibility for planning and executing a complete lift to us, whether it be standard or complex.

With a range of completed lifts including the Canary Wharf chiller installation, Custom House/ExCel Bridge and the Heathrow Terminal 3 'Sky Walk', we are well placed to take on board, design and deliver your contract lift requirements.

Select's expertise in delivering bespoke lifting capability is ideally suited to contract lifts or specialist lifting requirements. Having delivered some of the most challenging lifting operations across the UK, our 40 years of experience in this area is highly regarded. We provide a comprehensive service from initial planning to execution – including the supply of specialist equipment, support documentation, radio communications, generators, crane operators, and expert service and maintenance teams.

## Materials and Plant Movement

Select is recognised as one of the UK's leading specialist in the installation and removal of MEP equipment, pods, modules, prefabricated components and materials, with fully kitted plant handling vans and rigging operatives. Our material and plant movement solution includes site surveys, site planning, and lift-specific method statements and risk assessments.

## Site Solutions

Through years of experience and involvement in construction and infrastructure projects across the globe, Select knows what's needed to get a new project site up and running.

We know that the design and coordination of supporting services can be critical to the efficient programme delivery, and by appointing Select to work with you at the earliest stages, we can help you conceive, design, deliver and operate every aspect of your planned infrastructure.

All of our Site Solutions are designed, delivered, implemented, maintained and deconstructed by us, leaving you time to make the important decisions.

## Modular Accommodation

Select offers full installation, management and dismantling service, from standalone to complete site solutions.

Select is renowned for providing exceptional modular accommodation and has played a key role in the delivery of some of the UK's most iconic construction projects, such as The Francis Crick Institute, One Hyde Park, Grosvenor Place and Manchester Airport. Our excellence in delivery means we are now recognised as one of the UK's leading providers of temporary site accommodation. Over the last decade, we have provided **over 6000 units** across a range of projects.

Select is powered by a commitment to innovation - our modular accommodation team continuously seeks improvements through developments in design specifications, quality, and safety. This innovation enables us to provide the best quality product effectively and efficiently.

## Entirely Flexible

Our modular units are entirely flexible. We have the capability to serve projects ranging from standalone units to a full multi-storey office complex consisting of over 100 units. This flexibility allows our design team to cater for completely bespoke requirements.

## Early, Accurate Advice

Our modular accommodation service is available from the earliest preliminary stages of your project, allowing you to provide accurate information and costs to incorporate in quotations, bids and tenders. Our in-house team of engineers can produce detailed AutoCAD drawings of your building, as well as supplying foundation designs and loadings.

## Detailed Installation Programme

Select provides detailed installation programmes to fit your schedule. The end product sees us delivering an accommodation facility that is fully functional and fit for purpose from the very first day of your project.

Our service is comprehensive. It covers internal and external fit out - including electrics, plumbing and carpets - along with a full logistical package - including transport, sequencing, foundations, crane supply and lifting management.

## Bespoke Solutions in Complex Locations

Select has extensive experience in delivering bespoke site accommodation facilities in logically complex locations. We deliver fully fitted-out cabins and assemble them on site with our in-house specialist lifting capabilities. This minimises our time on site and any resulting disturbance.

# Site Wide Services

**Site Wide Services provide the initial design and coordination between clients and our specialist support solutions.**

With our highly experienced team of expert technicians, we are able to quickly analyse project requirements and proceed to develop efficient and practical solutions. As well as this, we install, test and maintain temporary electrical and mechanical services.

## Electrical Services:

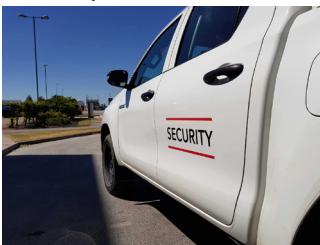

- Consultation and design at tender stage
- Temporary builders supplies and GRP cubicles
- High Voltage standalone/package substations
- Temporary site distribution boards
- Temporary electrical supplies to cabin set-ups
- Electrical fit-out of temporary in-situ welfare facilities
- Temporary electrical supplies to tower cranes and mortar silos
- Safety and emergency site lighting
- 110V distribution
- 16A-125A RCD protected socket outlets/welding outlets
- Temporary site evacuation and first aid call alarms
- Design, installation and verification testing of welfare fire alarms
- Maintenance
- Electrical verification and testing

## Mechanical Services:

- Consultation and design at tender stage
- Water and waste services to cabin set-ups
- Internal fit-out of temporary in-situ welfare facilities
- Temporary water bib taps
- Water supplies to silos
- Water heating
- Booster pump sets and potable break tanks
- Foul drainage pumping stations
- Water drinking fountains
- Trace heating
- Chlorination and lab testing

# Site Security

As with all aspects of Select Plant Hire, we offer a fully comprehensive package, covering all aspects of security on site, from passive measures such as Boundaries and Hoarding, to CCTV and Manned Guarding. We currently operate on 25 locations nationwide, on several high profile and high-risk projects, including Hinckley Points accommodation village, Manchester Airport, Cambridge Biomedical Campus and Edinburgh St James shopping centre.

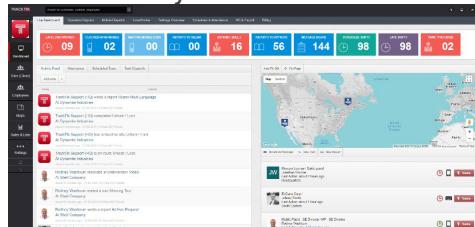

## Manned Guarding

The benefits of using our service include, but are not limited to the following:

- Our guards will generally be ex HM Forces or ex Police Officers
- All Guards will be trained Traffic Marshals, removing need for Gatemen
- All guards will be fully First Aid trained and will hold CSCS status
- All Guards will have full PPE prior to deployment to site
- Site specific assignment instructions, regularly reviewed
- Health & Safety risk surveys carried out prior to deployment
- Regular review meetings between the Project and Security Teams

As well as this, we have a 24 hour manned National Control Centre, which is remotely linked to the site through our innovative manned guarding system. This system is unique in allowing clients full transparency on guarding operations and provides the assurance that our guarding service meets both the clients and Select's own high expectations.

## Hoarding

Whether your site needs steel hoarding or permanent fencing, Select offer a full installation through to dismantling service. Our experienced installation teams are Street Works Certified and CSCS qualified, working to the highest safety standards whilst erecting and dismantling your hoarding.

Our main products include both 'above-ground' and 'in-ground' hoarding, depending on the required installation rate and any shallow services. Timber and metal hoarding are our most popular hoarding solutions; however we are able to deliver any specialist hoarding solutions that you may require through our integrated supply chain.

## CCTV

CCTV is an important third aspect in Site Security, and one that Select takes seriously. We have a 24 hour manned National Control Centre which will look after the welfare of your site, monitor CCTV remotely and can dispatch Mobile Response Officers to attend to any alarm activations or incidents reported

# Site Facilities

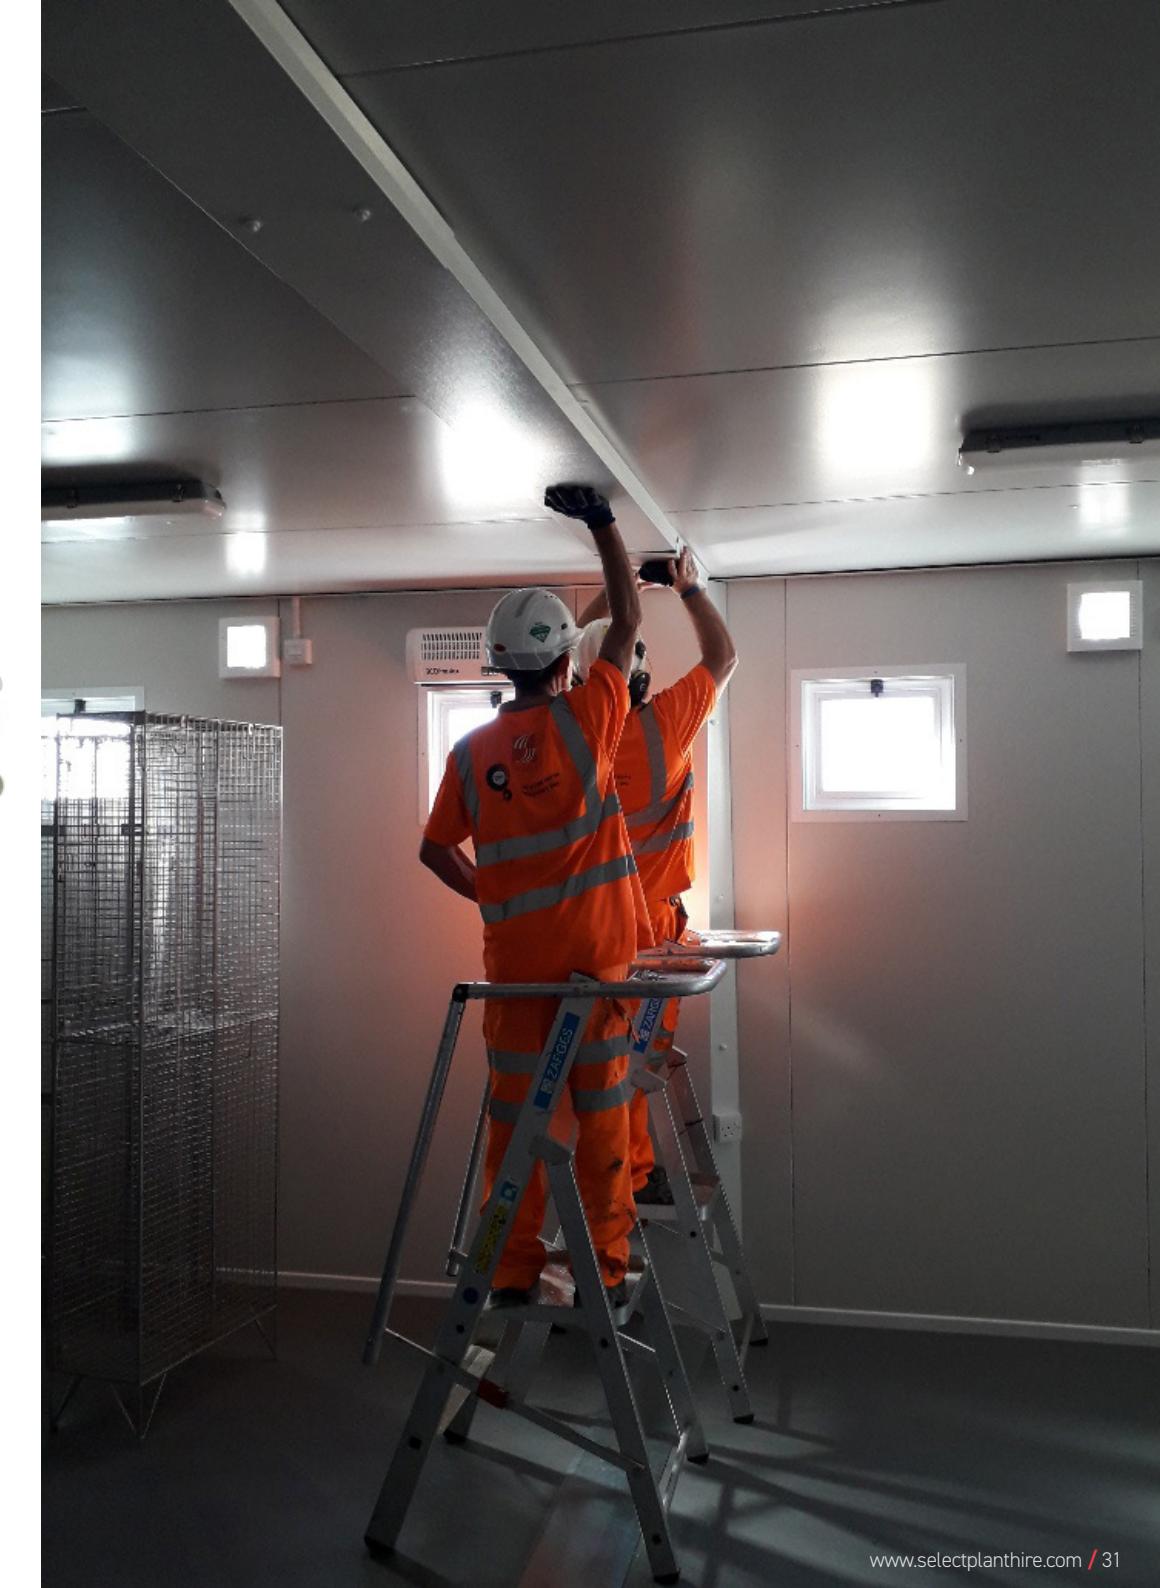

Site solutions offer a full management service of your site facilities. This includes but is not limited to:

- Furniture
- Photocopiers
- Welfare Furnishings
- Cleaning
- Canteen facilities

The scope of these activities are all planned at consultation meetings, leading to a hassle free, integrated, site set-up and working environment for the site team.

Furniture is supplied to client specified levels of quality and finish; we also have preferred ranges that offer high quality furnishing at excellent value for money. All furniture supply includes installation on site to the agreed drawings.

During consultations our in-house team produce AutoCAD drawings of your accommodation layout, including indicative sizing of furniture and facilities, allowing you to picture exactly how your facility will look and feel.

## Specialist Plant

Our specialist plant capability has played a key role in delivering some of the industry's most complex projects by applying our experience and relentless focus on safety and continuous improvement to support our clients' requirements.

Select owns and operates a comprehensive range of specialist plant equipment, including piling rigs with Tier 4 engines and market-leading emissions performance. Our machines are designed to add value and increase safety to client operations, most being fitted with platforms and walkway systems.

## Piling

Select, through its piling business, has been carrying out ground engineering, piling operations and the supply of tools and equipment to the industry for over 65 years.

Our people and equipment have played a key role in delivering some of the industry's most complex projects by applying our experience and relentless focus on safety and continuous improvement to support our client's requirements.

Select Plant Hire now boasts the youngest piling fleet in the country, which includes the first Tier 4 engines on piling rigs in the UK, with market leading emissions performance.

Within our fleet, we have machines ranging from 35 to 140t, with specifications designed to add value and increase safety to client operations.

### Fabrication

At Select, we take pride in manufacturing piling tools and their components. We have the ability and know-how to build and repair any type of piling equipment: flight augers, bucket augers, core barrels etc. Recent investments in our facilities include a new digital profiler, which assists in the manufacture of most of our equipment, and reduces the need for grinding and cutting by hand, producing higher quality finishes and increasing safety in our workplace.

### Repair and Maintenance

No matter how complex your machinery maintenance or repair requirements, our fitting department is equipped and experienced to help.

All Select technicians are trained, qualified and certified for the tasks involved in plant repairs, and our managers are experienced specialists in piling equipment, maintenance, repair, and can offer additional advice and support on-site.

We are constantly working with our rig manufacturers and supply partners to ensure we are at the forefront of new technology, whether engine efficiency or safety developments.
